

Lake Haven's Lambs

This week we welcomed Bo and Peep our little lambs. They are only one week old so they need feeding every four hours with milk. We have to carefully measure the milk powder and mix with warm water at a temperature of between 40-42 degrees.

As the little lambs are so tiny and do not have a mummy to keep them warm. We are using a heat lamp and the lambs are wearing a jumper to keep them nice and toasty.

When the lambs are big enough, they will move in with Mummy Goat into the paddock by the park.

We are all very much in love with Bo and Peep.
