4 Appendices and Department for Education Templates

- Appendix 1: Model HCP flowchart
- Appendix 2: Letter for consent to use emergency inhaler
- Appendix 3: Letter to inform of use of emergency inhaler
- Appendix 4: Body map
- Template A: Individual healthcare plan (HCP)
- Template B: Parental agreement for setting to administer medicine
- Template C: Record of medicine administered to an individual child
- Template D: Record of medicine administered to all children
- Template E: Staff training record – administration of medicines

1. Introduction

1 Introduction

1.1 This policy has been developed for schools to ensure pupils are fully supported with medical conditions. It has been developed in line with the Department for Education statutory guidance on Supporting Pupils with Medical Conditions December 2015.

<https://assets.publishing.service.gov.uk/media/5ce6a72e40f0b620a103bd53/supporting-pupil-s-at-school-with-medical-conditions.pdf>

1.2 Lake Haven has adapted this policy to represent its setting as required.

1.3 The policy from the DFE was used as a starting point and customised to reflect management, training, administering and medication storage procedures of the individual school.

2. Medication Policy Statement

2 Section 100 of the Children and Families Act 2014

2.1 This places a duty on governing bodies of maintained schools, proprietors of academies and management committees of pupil referral units (PRUs) to make arrangements for supporting pupils at their school with medical conditions.

2.2 The aim of this policy is to ensure that Lake Haven carries out their statutory duty to make arrangements to support pupils at school with medical conditions.

2.3 Lake Haven schools will:

2.3.1 ensure that the arrangements detailed within this policy are implemented effectively, by The Headteacher of Lake Haven, who has overall responsibility for policy implementation

2.3.2 only administers medications prescribed by a healthcare professional.

2.3.3 have clear roles and responsibilities to be able to support pupils so that they have full access to education, including school trips and physical education.

2.3.4 ensure full cooperation with all relevant parties; healthcare professions, local authority and clinical commissioning groups (CCGs) as required

2.3.5 provide support and training to enable staff to support pupils with medical conditions

2.3.6 ensure that clear arrangements are in place to manage the administration and storage of all medicines on the premises

2.3.7 ensure that the appropriate level of insurance is in place to appropriately reflect the

level of risk

2.3.8 ensure that written records are kept of all medicines administered to pupil

2.3.9 ensure that emergency procedures are in place and shared with all staff

2.3.10 ensure that all staff are aware of what practice is not acceptable

2.3.11 ensure that a complaints procedure is in place regarding the support provided to a pupil with a medical condition.

3. Medication Management Procedures

The following sections in the Management Procedures outline how Lake Haven will ensure that the Medication Policy Statement is implemented.

Further reference documentation and guidance is detailed at the end of the policy.

3.1 Roles and Responsibilities

The Proprietor:

3.1.1 must make arrangements to support pupils with medical conditions in school, including making sure that this policy is implemented.

3.1.2 should ensure that pupils with medical conditions are supported to enable the fullest participation possible in all aspects of school life.

3.1.3 should ensure that sufficient staff have received suitable training and are competent before they take on responsibility to support children with medical conditions.

3.1.4 should ensure that any members of school staff who provide support to pupils with medical conditions are able to access information and other teaching support materials as needed.

Head Teacher:

3.1.5 should ensure that the School's policy is developed and effectively implemented with all partners. This includes ensuring that all staff are aware of the policy for supporting pupils with medical conditions and understand their role in its implementation.

3.1.6 should ensure that all relevant staff are aware of the pupil's conditions.

3.1.7 should ensure that sufficient trained numbers of staff are available to implement the policy and deliver against all individual healthcare plans, including in contingency and emergency situations.

3.1.8 should make sure that school staff are appropriately insured, and are aware that they are insured to support pupils in this way.

3.1.9 should be aware that they have overall responsibility for the development of individual healthcare plans.

3.1.10 should contact the school nursing service in the case of any child who has a medical

condition that may require support at school, but who has not yet been brought to the attention of the school nurse.

School Staff:

3.1.11 should be aware that they may be asked to provide support to pupils with medical conditions, including the administration of medicines.

3.1.12 should take into account the needs of pupils with medical conditions that they teach, although administering medicines is not part of a teachers' professional duties.

3.1.13 should receive sufficient and suitable training and achieve the necessary level of competency before they take on responsibility to support children with medical conditions.

3.1.14 should know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

School Nurse:

3.1.15 should be aware of their responsibilities for notifying the school when a pupil has been identified as having a medical condition which will require support in school

3.1.16 can support staff on implementing a pupil's individual healthcare plan and provide advice and liaison, for example, on training

3.1.17 can liaise with lead clinicians locally on appropriate support for the pupil and associated staff training needs.

Other healthcare professionals (including GP, paediatricians, nurse specialists/ community paediatric nurses):

3.1.18 should notify the school nurse and work jointly when a pupil has been identified as having a medical condition that will require support at school.

3.1.19 may provide advice on developing healthcare plans

3.1.20 specialist local health teams may be able to provide support in schools for pupils with particular conditions (eg asthmas, diabetes, epilepsy)

3.1.21 should ensure any prescribed medications, including dosages, are appropriately monitored and reviewed.

Pupils:

3.1.22 should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of, and comply with, their individual healthcare plan.

Parents/Carers:

3.1.23 should provide the school with sufficient and up to date information about their son/daughter's medical needs.

3.1.24 should be involved in the development and review of their son/daughter's individual

healthcare plan.

3.1.25 should carry out any action they have agreed to as part of its implementation (eg provide medicines and equipment and ensure that they or another nominated adult are contactable at all times)

3.2 Training/Qualifications for Supporting Pupils with a Medical Condition

3.2.1 Specific support and training needs will be identified through the Individual Health Care Plans (HCP), together with who will provide the training. This will enable staff who support a pupil with a medical condition to understand the specific conditions, their implications, preventative and emergency procedures.

3.2.2 Lake Haven will ensure that adequate first aid cover is available at all times. The first aider role is key in emergency procedures – see section 3.5. However, a first aid certificate does not constitute appropriate training in the general day to day support of a pupil with a medical condition.

3.2.3 Training on administering medications/injections for specific medical conditions at the school will be delivered by a suitably qualified health professional.

3.2.4 Named staff will be responsible for administering a pupil's medication. When a controlled drug has been prescribed for a pupil's medical condition, at least two members of staff should be trained on how to manage this medication.

3.2.5 Arrangements should be in place to cover staff absence, or staff turnover, so that someone is always available.

3.2.6 All training should be documented on the Department for Education's Template E, together with a clear plan for refresher sessions, or updates if the pupil's condition changes.

3.2.7 The school will ensure that whole school awareness training will take place at least annually. This should include the contents of this policy, and awareness of common conditions such as asthma allergies, epilepsy and diabetes. This training will be delivered by a suitably qualified person.

3.2.8 It is recognised that it is not a requirement to have specific training to administer non prescribed medications such as pain relief or antihistamines.

3.2.9 The medicine box is kept in the school office.

3.2.10 All staff who administer medication should be aware of:

- what medication is in the box.
- who it belongs to and a copy of the parental consent – see Template B.
- the dose and frequency of administration to the pupils concerned .
- who will administer this medication.

3.3 Managing Medications on School Premises

3.3.1 Liability and Indemnity

3.3.1.2 Lake Haven will ensure that a level of insurance is in place that appropriately reflects the level of risk for managing medication on the premises. The Department for Education's guidance for "Supporting Pupils at School with Medical Conditions 2015" refers to the appropriate level of insurance being in place. Lake Haven's insurance provision is with Ecclesiastical Insurance. The policy covers specific medication for a named child as detailed in their health care plan along with the general provision of Calpol, Paracetamol, inhalers etc.

3.3.1.3 The insurance arrangements will cover staff providing support to pupils with medication conditions. Insurance policies should be accessible to staff providing such support.

3.3.1.4 The level and scope of insurance cover required must be ascertained directly from the insurers. Any requirements of the insurance, such as the need for staff training, should be complied with. Insurers should be updated when a pupil is newly diagnosed, if a pupil's condition changes resulting in extra support needs, or if a pupil with a medical condition leaves the school.

3.3.2 Health Care Plan (HCP)

3.3.2.1 A Health Care Plan – see Department for Education's Template A - will be used to record the support of an individual pupil for their medical condition. The HCP is developed with the pupil (where appropriate), parent/carer, designated member of school staff, specialist nurse (where appropriate) and relevant healthcare services. Appendix 1 is a Department for Education model flowchart for a HCP.

3.3.2.2 Where a child has SEN but does not have a statement of EHC plan, their special educational needs are mentioned in their HCP.

3.3.2.3 The HCP will cover the following:

3.3.2.3.1 the medical condition, its triggers, signs, symptoms and treatments

3.3.2.3.2 the pupil's resulting needs, including medication (dose, whether it is a controlled drug, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and any environmental issues (crowded corridors, travel time between lessons)

3.3.2.3.3 specific support for the pupil's educational, social and emotional needs – for example how absences will be managed, requirements for extra time to complete exams, rest periods or additional support in catching up with lessons

3.3.2.3.4 the level of support needed, including emergencies. If a pupil is self-managing their medication, this should be clearly stated with appropriate arrangements for monitoring

3.3.2.3.5 who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the pupil's medical condition from a healthcare professional; and cover arrangements for when they are

unavailable

3.3.2.3.6 who in the school needs to be aware of the pupil's condition and the support required

3.3.2.3.7 arrangements for written permission from parents and the Head Teacher for medication to be administered by a member of staff, or self-administered by the pupil during school hours

3.3.2.3.8 where confidentiality issues are raised by the parent/child, the designated individuals to be entrusted with information about the pupil's conditions

3.3.2.3.9 emergency plans, including whom to contact and contingency arrangements.

3.3.2.4 The school will keep a centralised register of HCPs, and identify a member of staff to have responsibility for this register.

3.3.2.5 HCPs will be reviewed regularly, at least every year, or whenever the pupil's needs changes.

3.3.2.6 The parents/carers, specialist nurse (where appropriate) and relevant healthcare services should hold a copy of the HCP. Other school staff will be made aware of, and have access to the HCP for the pupils directly in their care.

3.3 Administering Medications

3.3.1 Medication will only be administered when it would be detrimental to a pupil's health or school attendance not to do so.

3.3.2 The school will not give any medication (prescribed and non-prescribed to a child under 16 without a parent's written consent except in exceptional circumstances under direction of a medical professional.

3.3.3 The school will normally only administer non-prescribed medications with prior written consent on day trips, activities away from school or residential trips and for a maximum of 3 days, even where parents give permission. The only exception to this is if pain relief is required during the healing period of an injury such as a sprained joint, or broken/fractured limb.

3.3.4 When administering non-prescribed pain relief or cough relief medication, the member of staff will check the maximum dosage and when a previous dose was given. Parents/carers will be informed of all doses given at school – see Template C/D.

3.3.5 A child under 16 years of age should never be given medicine containing Aspirin unless prescribed by a healthcare professional.

3.3.6 Some medicines need to be given at specific times, for example:

3.2.10. before, with or after food – the absence/presence of food in the stomach can affect how the medicine works and may cause side effects

3.2.10. some illness can only be controlled with very precise dose timings, for

example, seizures may only be controlled if the medication is taken at set times

Oral Mixtures

3.3.7 A measuring spoon/syringe/vessel must be provided by the parent/carer, and the dose of medicine is measured using this. Instructions on the medication label must be followed. Wherever possible, the spoon/syringe/vessel should be handed to the pupil for them to administer the dose themselves. Each individual pupil's spoon/syringe/vessel should be cleaned and kept with their own medication.

Tablets/capsules

3.3.8 Pupils who need tablets usually take them before or after their meal according to their GP's instructions. They may however be needed at other times of the day.

3.3.9 Pupils should go to the school office and ask for their tablets from the appropriate member of staff (see Training).

Inhalers

3.3.10 Inhalers will be kept in the student's school buildings and a spare kept in orange adrenaline and inhaler emergency box near the first aid chair in the school house. When the pupil needs to take their inhaler, e.g. before a PE lesson, or at break time/lunchtime, the teacher/admin staff should record this on a daily record. When a child increases the number of times they need their inhaler, staff will be alerted to this by the record, and they are able to pass this information onto the parents, so that the 'preventer' inhaler dose can be checked by their GP.

3.3.11 Pupils are trained how to access and use their inhaler, and the importance of adult supervision. Pupils should be supervised when they take their inhaler. If they have any difficulty, the First Aider should be called to assist.

3.3.12 If parents request that their child keeps their inhaler with them during the day, the pupil must be reminded by the class teacher to record when a dose has been taken

Emergency Medication for Anaphylactic Shock

3.3.13 Pupils with a known allergy, for example, to wasp stings, food allergies and medications, should have a Health Care Plan (HCP), with an emergency action plan, completed by their healthcare professional.

3.3.14 Where an adrenaline autoinjector has been prescribed, the pupil's parent/carer should ensure that two in date adrenaline auto injectors (eg an Epi Pen) are kept in the school. If appropriate, the pupil may keep an autoinjector on their person within their school building – refer to the section on Self-Management. If this is not appropriate, the adrenaline devices should be kept safely in a grab bag located in their classroom.

3.3.15 If a pupil is going into anaphylactic shock, the emergency services will be called immediately – see Emergency Procedures 3.4.

3.3.16 If there is an emergency situation where a pupil has no previous history or knowledge of having an allergy but symptoms suggest anaphylactic shock is occurring, the spare adrenaline device will be used and the emergency services will be called. The spare device is located in the emergency orange box next to the first aid chair in the School House.

Injections

3.3.17 School staff will not give a pupil an injection unless staff have agreed and specific training to do so has been delivered. This training will be delivered by a qualified appointed health care professional.

Ointments/creams

3.3.18 The school will only administer ointments/creams prescribed by healthcare professionals. All efforts should be made for the pupil's ointment/cream to be applied at home by parents/carers. If it is necessary to apply a prescribed dose during school hours, this should be recorded on Template C.

3.3.19 If it is a long-term prescription (ie, more than 4 weeks), a Healthcare Plan should be provided by the pupil's healthcare professionals.

3.3.20 The pupil will be encouraged to apply the cream/ointment themselves, under supervision from a member of staff. Where this is not possible due to competency or location area on the body then the Department for Education's Template B should be completed. A body map should be completed for the area where the cream/ointment is to be applied – See Appendix 4.

Eye, Nose and Ear Drops

3.3.21 The school will only administer ear, nose or eye drops prescribed by healthcare professionals. All efforts should be made for the pupil's ear, nose or eye drops to be applied at home by parents/carers. If it is necessary to apply a prescribed dose during school hours, this should be recorded on the Department for Education's Template C. The drops should be administered, following the label's instructions by a member of staff. Good infection prevention practice should be adhered to, i.e. using a clean environment, with handwashing facilities immediately available.

Self-Management

3.3.22 It is good practice to support and encourage pupils, who are able, to take responsibility to manage their own medicines from a relatively early age, and the School will encourage pupils to manage the use of their inhalers and adrenaline autoinjectors (epi pens) accordingly. The School acknowledges that the age and aptitude at which pupils are ready to take care of and be responsible for their own medication varies.

Refusal to take Medication

3.3.23 If a pupil refuses to take their medication, staff should not force them to do so. If a prescribed condition critical medication/injection is refused, the School must take prompt action by informing the parent/carers and healthcare professional as soon as possible, as outlined in their HCP.

3.3.24 If a pupil refuses to take a non-prescribed medication, this should be recorded in the pupil's records. Parents/carers should be informed of the refusal on the same day.

3.3.25 If a refusal to take medication results in an emergency, the School's emergency procedures should be followed – see Section 3.4.

3.3.4 Storage

3.3.5.1 All medications should be stored safely. Pupils with medical conditions should know where they are at all times and have access to them immediately.

3.3.5.2 The School should provide cold storage for medications once opened, if required, as directed by prescription/written instructions from a healthcare professional. There is a fridge located in the staff area of the school where no children are allowed to enter unaccompanied.

3.3.5.3 Medications should not be stored in any first aid boxes on the premises.

3.3.5.4 The School should only accept prescribed medication that is in date, labelled and in its original container including prescribing instructions for administration.

3.3.5.5 Medicine with the exception of individual inhalers should be stored in a named Medical Box with each pupil's medicine clearly marked with the pupil's name and the dose to be taken. A photograph of the pupil can be attached to the medication for clear identification. Facilities should be available to ensure that the medications are stored at the correct temperature if stated on the medication label/HCP.

3.3.5.6 Parents/carers should be asked to collect all medications/equipment at the end of the school term, and to provide new and in date medication at the start of each term.

3.3.5 RECORD KEEPING

3.3.5.1 As part of the School's admissions process and annual data collection exercise, parents/carers are asked if their son/daughter has any medical conditions. These procedures also cover transitional arrangements between schools.

General Record Keeping

3.3.5.2 The pupil's confidentiality should be protected and the School should seek permission from parents/carers before sharing any medical information with any other party.

3.3.5.3 The School will keep an accurate record of all medication administered, including the

dose, time, date and supervising staff by using the Department for Education's Template C and D attached.

3.3.6 Controlled Drugs

3.3.6.1 Some pupils may require routine, or emergency prescribed controlled drugs administered whilst at school. Controlled Drugs require additional safety controls for storage, administration and disposal, under the Misuse of Drugs Regulations 2001. The School should follow these to ensure that all legal requirements and best practice are adhered to. 3.3.6.2 A list of commonly encountered controlled drugs can be found at the following link:

[List of most commonly encountered drugs currently controlled under the misuse of drugs legislation - GOV.UK \(www.gov.uk\)](http://www.gov.uk/government/uploads/system/uploads/attachment_data/file/150220/15-02-2013-controlled-drugs-regulation-information.pdf)

3.3.6.3 Guidance on how a controlled drug is classified can be found at the following link:

[15-02-2013-controlled-drugs-regulation-information.pdf \(publishing.service.gov.uk\)](http://www.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/150220/15-02-2013-controlled-drugs-regulation-information.pdf)

3.3.6.4 An example of a medical condition that may require a controlled drug is ADHD, for which methylphenidate (Ritalin[™]) for example, may be prescribed.

3.3.6.5 Midazolam Buccal, which is a medication used for controlling seizures, is a Schedule 3 controlled drug, and does not require the same controls as other Schedule 1 and 2 controlled drugs under the legislation. However it is best practice to store and control this medication in the same way as other controlled drugs.

3.3.6.6 A controlled drug can only be admitted on the school premises if it is recorded in the pupil's individual healthcare plan – see the Department for Education's Template A: Individual Healthcare Plan. When a controlled drug is prescribed, and has to be administered during school hours, it should be highlighted on Template A. Extra training requirements should be highlighted and undertaken for staff administering a controlled drug. Advice should be sought from healthcare professionals, or the School Nurse, together with consultation with the parent/carers.

3.3.6.7 The following requirements should be met, in line with the above legislation:

Storage

3.3.6.8 the medication should be double locked, i.e. in an appropriate storage container, in a locked room. The medication may need to be kept refrigerated once opened, and this should be made clear on the HCP. Our medication is stored in a locked cabinet in the staff area. The key for this cabinet is stored in the key safe within a combination lock.

3.3.6.9 named staff only should be allowed access to the medication. A plan for obtaining the medication for a medical emergency, or school evacuation, should be put into place.

Administering

3.3.6.10 two members of staff should be present when the drug is to be administered, to double check the dose is correct. One person will administer the dose, and the second person will witness its administration.

Record Keeping

3.3.6.11 A separate Controlled Drug register should be kept, to record each dose that is administered, and should be signed by the two members of staff who administer the medication. This register is to be kept for two years from the date of the last entry in the register.

3.3.6.12 If misuse of a controlled drug is suspected, all records should be checked by Senior Management and the Head Teacher, and reported to the Police/Local Intelligence Network (LIN). Guidance on this should be sought from healthcare professionals.

Unused Controlled Drugs

3.3.6.13 unused controlled drugs should be destroyed under specific controlled conditions. This should be referred to on the HCP, and advice taken from healthcare professionals.

3.3.7 Unacceptable Practice

3.3.7.1 Although school staff should use their discretion and judge each case on its merits with reference to the pupil's individual healthcare plan, the following is generally not acceptable practice.

3.3.7.2 The School will not:

3.3.7.2.1 prevent pupils from easily accessing their inhalers and medication and administering their medication when and where necessary

3.3.7.2.2 penalise pupils for their attendance record if their absences are related to their medication condition, eg hospital appointments.

3.3.7.2.3 requires parents, or make them feel obliged, to attend school to administer medications, or provide medical support to their child.

3.3.7.2.4 assume that every pupil with the same condition requires the same treatment

3.3.7.2.5 ignore the views of the pupil or their parents; ignore medical evidence or opinion

3.3.7.2.6 send pupils with medical conditions home frequently for reasons associated with their medical condition or prevent them from staying for normal school activities, including lunch, unless this is specified in their individual healthcare plans

3.3.7.2.7 send a pupil to the school office/medical room if they become ill unaccompanied, or with an unsuitable person

3.3.7.2.8 prevent pupils from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively

3.3.7.2.9 prevent pupils from participating, or create unnecessary barriers to children participating in any aspect of school life, including school trips, eg by requiring parents to accompany the pupil.

3.3.7.3 If a pupil misuses their medication, or anyone else's, their parent/carer is informed as soon as possible and the School's disciplinary procedures are followed.

3.3.7.4 The School will ensure that all staff responsible for administering medications understand that they must strictly adhere to the prescription dosage, and the implications for not doing so. This will be done at the time of agreeing to undertake this role.

3.3.7.5 Staff should be aware that they must not alter/amend any medications, ie by crushing tablets or increasing a dose if requested by the pupil. Specific written instructions will be given by a healthcare professional if there are any changes to a dose or methods of administration.

3.3.7.6 The School will make it clear to staff responsible for administering medicines of the implications for covertly taking medications and that the School will immediately undertake disciplinary action/police investigations as needed.

3.3.7.7 If a member of staff does not administer medication to a pupil when they are required to do so and/or they administer the incorrect medication and/or the incorrect dosage they must notify the Head Teacher immediately and notify the pupil's parent/carer as soon as possible. Medical advice should be sought from the parent/carer or medical professionals on how best to proceed following the discovery of the error. Details of the error should be recorded appropriately.

3.3.8 Complaints Procedure

3.3.8.1 Should parents/carers be dissatisfied with the support provided, they should discuss their concerns directly with the School. If, for whatever reason this does not resolve the issue, they may make a formal complaint via the school's complaints procedure.

3.4 Emergency Procedures

3.4.1 The flowchart follows Template F of the Department for Education statutory guidance.

3.4.2 Staff should not take pupils to hospital in their own vehicle.

3.4.3 Where an Ambulance needs to be called in school, there are several roles which need to be fulfilled. The responsibility for these roles is fluid, to cover staff absence/cover. All staff should be aware of the procedures.

Contacting emergency services

Dial 999, ask for an ambulance and be ready with the information below.

Speak clearly and slowly and be ready to repeat information if asked.

1. your telephone number
2. your name
3. your location as follows - Lake Haven School, Bazzard Road, Makin's Fisheries, Nuneaton, CV11 6QJ
4. state what the postcode is – please note that postcodes for satellite navigation systems may differ from the postal code
5. provide the exact location of the patient within the school setting
6. provide the name of the child and a brief description of their symptoms
7. inform Ambulance Control of the best entrance to use and state that the crew will be met and taken to the patient
8. put a completed copy of this form by the phone

3.5 Managing Medications on an Outing/Residential Visit

3.5.1 Risk assessments are completed before each school trip and outing. Risks for pupils with known medical conditions are considered, as well as any potential risk to others.

Pupils who require short term medication for the duration of the trip/residential

3.5.2 Parent/carers complete medical forms at least three weeks before the visit at which point the School will establish, from parents/carers, the medication, circumstances in which it can be administered, the precise time the dose is given and the exact dose.

3.5.3 All medication must be provided in the original packaging as supplied from the pharmacy.

Pain Relief

3.5.4 Pupils who require regular/prescribed pain relief that needs to be taken whilst on an outing/residential visit must bring in their own supply of the medication and parents must complete a separate medication consent form. All pupil medication will be held in by the Visit Leader.

3.5.5 The School may take a central store of medication such as Calpol/paracetamol on a residential visit. Parental consent must still have been given for administration. This will be achieved as part of the parental consent to act in loco parentis in emergency situations. Prior to administering medication that has not been directly provided by the parent/carer, the Visit Leader will always attempt to contact the parent/carer to explain why the medication is being given.

Pupils with an Individual Healthcare Plan in place

3.5.6 For pupils with known medical conditions, staff will make contact with the parent/carer in advance of the trip. This will ensure that they are fully briefed to ensure that there are adequate quantities of medication available, that the pupil's condition is stable, and which emergency details are required should the pupil need to have additional support. This is documented for the Group Leader.

3.5.7 For Early Years/Foundation Stage pupils, where it is assessed that the pupil cannot self manage their inhaler, Group Leaders will ensure that staff keep the inhalers for pupils allocated to them. All doses administered need to be recorded.

Controlled drugs

3.5.8 The School will make every effort to accommodate pupils with a medical condition who require controlled drugs to be administered when in the school's care, but off the school premises. For a residential visit, consultation with the venue will need to take place, to

ensure safe storage facilities will be in place.

3.6 Further Guidance and Legislation

Department for Education – “Supporting Pupils at School with Medical Conditions - December 2015”
Royal Pharmaceutical Society of Great Britain (RPSGB) - The Handling of Medicines in Social Care
Department of Health - “Guidance on the use of emergency salbutamol inhalers in school – March 2015”

[Drug misuse and dependence: UK guidelines on clinical management - GOV.UK \(www.gov.uk\)](http://www.gov.uk)

[List of most commonly encountered drugs currently controlled under the misuse of drugs legislation - GOV.UK \(www.gov.uk\)](http://www.gov.uk)

LEGISLATION:

Section 2 of the **Health and Safety at Work Act 1974** and the associated regulations, provides that it is the duty of the employer, Lake Haven, takes reasonable steps to ensure that staff and pupils are not exposed to risks to their health and safety.

Misuse of Drugs Regulations 2001 and associated regulations the supply, administration, possession and storage of certain drugs are controlled. Schools may have a pupil who has been prescribed a controlled drug.

The Medicines Act 1968 specifies the way that medicines are prescribed, supplied and administered within the UK and places restrictions on dealings with medicinal products, including their administration.

Regulation 5 of the School Premises (England) Regulations 2012 (as amended) provides that maintained schools must have accommodation appropriate and readily available for use for medical examination and treatment and for the caring of sick or injured pupils. It must contain a washing facility and be reasonably near to a toilet. It must not be teaching accommodation.

Section 100 of the Children and Families Act 2014 places a duty on governing bodies of maintained schools, proprietors of academies and management committees of pupil referral units (PRUs) to make arrangements for supporting pupils at their school with medical conditions

Template F: contacting emergency services

Request an ambulance - dial 999, ask for an ambulance and be ready with the information below.

Speak clearly and slowly and be ready to repeat information if asked.

1. your telephone number
2. your name
3. your location as follows [insert school/setting address]
4. state what the postcode is – please note that postcodes for satellite navigation systems may differ from the postal code
5. provide the exact location of the patient within the school setting
6. provide the name of the child and a brief description of their symptoms
7. inform Ambulance Control of the best entrance to use and state that the crew will be met and taken to the patient
8. put a completed copy of this form by the phone

Template G: model letter inviting parents to contribute to individual healthcare plan development

Dear Parent

DEVELOPING AN INDIVIDUAL HEALTHCARE PLAN FOR YOUR CHILD

Thank you for informing us of your child's medical condition. I enclose a copy of the school's policy for supporting pupils at school with medical conditions for your information.

A central requirement of the policy is for an individual healthcare plan to be prepared, setting out what support the each pupil needs and how this will be provided. Individual healthcare plans are developed in partnership between the school, parents, pupils, and the relevant healthcare professional who can advise on your child's case. The aim is to ensure that we know how to support your child effectively and to provide clarity about what needs to be done, when and by whom. Although individual healthcare plans are likely to be helpful in the majority of cases, it is possible that not all children will require one. We will need to make judgements about how your child's medical condition impacts on their ability to participate fully in school life, and the level of detail within plans will depend on the complexity of their condition and the degree of support needed.

A meeting to start the process of developing your child's individual health care plan has been scheduled for xx/xx/xx. I hope that this is convenient for you and would be grateful if you could confirm whether you are able to attend. The meeting will involve [the following people]. Please let us know if you would like us to invite another medical practitioner, healthcare professional or specialist and provide any other evidence you would like us to consider at the meeting as soon as possible.

If you are unable to attend, it would be helpful if you could complete the attached individual healthcare plan template and return it, together with any relevant evidence, for consideration at the meeting. I [or another member of staff involved in plan development or pupil support] would be happy for you contact me [them] by email or to speak by phone if this would be helpful.

Yours sincerely
